News Release No. 20-07  
November 16, 2007

## ROYAL ROADS ACQUIRES NEW NI PROJECT IN CENTRAL NEWFOUNDLAND

**Royal Roads Corp. (RRO-TSX-V)** ("Royal Roads") is pleased to announce that it has acquired through staking a 100% interest in mineral claims covering a newly recognized prospective environment for magmatic nickel sulphides in central Newfoundland known as the Long Range Nickel project. The 73.5 km<sup>2</sup> property covers a large gabbroic intrusive body including olivine bearing to ultramafic phases collectively known as the Puddle Pond Complex. Maps recently published by the GSC outline the limits of the body which they describe as being Silurian in age and locally hosting showings of sulphide mineralization. The same intrusive body is host to sulphide showings held by a local prospector, whose property adjoins claims recently acquired by a competing junior exploration company renowned for nickel sulphide exploration throughout eastern Canada.

Royal Roads has considerable in-house expertise with respect to exploration for magmatic nickel sulphide deposits in eastern Canada, and will be making plans for exploration on the newly acquired project in the coming months for 2008. The company will also be considering possible joint venture or option opportunities with respect to this property.

### **Management's Opinion**

Warren MacLeod, President, stated, "we are excited to be spreading our wings in Royal Roads as we begin to look at other commodities and opportunities beyond our flagship Tulks North property. While we remain committed to the Tulks project as our core project, we will look towards opportunities that arise which have the potential to yield significant shareholder returns and we believe the Long Range Nickel project is one such opportunity."

Paul Moore, M.Sc., P.Geo., (NL), Royal Road's Vice President of Exploration, is acting as Qualified Person in compliance with National Instrument 43-101 with respect to this release and has reviewed the contents for accuracy.

### **About Royal Roads**

Royal Roads is a resource company based in Halifax, Nova Scotia, Canada and is focused on exploring and developing base metal properties in central Newfoundland, Canada. Royal Roads and its 35.05% subsidiary, Buchans River Ltd., together control a total of 30,200 hectares within central Newfoundland's Victoria Lake and Buchans mining camps, including the historic Buchans mine (owned by Buchans River) and the Daniels Pond deposit (owned by Royal Roads). Royal Roads is 44.42% controlled by Acadian Gold Corporation, a Halifax based resource company developing gold and base metal properties, including the Scotia Mine (zinc and lead) in Nova Scotia.
